

Sustainability Foundational Policy

The Management Philosophy of the ID&E Group is "Act with integrity and contribute to society through technology and engineering." Based on this management philosophy, the ID&E Group promotes sustainability management in order to establish trust with stakeholders and contribute to the development of a sustainable society under fair and transparent corporate management based on values shared within the Group.

Sustainability in the context of our business encompasses multiple perspectives, and from the perspective of contributing to the creation of societal value through our business operations, we drive the following activities that address key societal challenges.

Accordingly, we will promote activities that help solve sustainability issues, focusing on the following eight priority areas identified by the Tokio Marine Group.

1. Take Climate Action
2. Improve Disaster Resilience
3. Support Healthy and Fulfilling Lives
4. Value People and Promote Diversity and Inclusion
5. Provide Innovative Solutions
6. Protect the Natural Environment
7. Provide Opportunities for Future Generations
8. Open Governance with Integrity
